

Introduction to the week

Fabrice.Kordon@lip6.fr

What you already know

2

The very basics

-  Survival guide in Objective-C and Swift
-  Using the environment development
-  Use StoryBoard and the simulator
-  Deploy on a device

Already «played a bit with iOS programming»

What's next this week

Objective-C

- Remind this is not a «programming course»
 - ▶ Mostly a syntactic description
- Memory management
 - ▶ You MUST be aware of the internals

More Stuff about Xcode

- Deactivate ARC
- Manage images
- All you need to know on buttons

Implement your first «real» Apps
