

Button customization using StoryBoard

Fabrice.Kordon@lip6.fr

Button styles

The most used ones

- Three shapes
- Tint color

Button's state

- default
- highlighted
- disabled
- etc.

Defining a custom button

How it looks

As a conclusion...

Nice to know (and use)

- You may change the background color too
- You may set an image as background

Most iOS interface elements can be customized

- Have a look at the
