

Introduction to the week

Fabrice.Kordon@lip6.fr

What you already know

Implement a simple application

- But «as professional as in the AppSore»

Deploy an application

- Simulator
- On devices

Handle view

- With Storyboard
- Programmatically
- Handling of orientation/multitasking
- Handling of various devices

What's next this week

No U turn...

-  Still «Geek mode»

More on views

-  Nice effects for your Apps

Around the views in a few days (starting)

-  Visiting predefined mechanisms

Some more serious use of delegation

-  Main choice for numerous frameworks
-  Structured call-backs
