

# Introduction to the week

Fabrice.Kordon@lip6.fr

# What you already know

2

- 📱 **Implement a simple application**
  - 👤 But «professional»
- 📱 **Deploy an application**
  - 👤 Simulator & devices
- 📱 **Manage views**
  - 👤 With StoryBoard
  - 👤 In the programmatic way
  - 👤 Handling various devices
  - 👤 Use «cool effects»
- 📱 **Deal with «delegation» (a little 😏)**
  - 👤 And completion handlers too

# What's next this week

## Don't even think about StoryBoard again

- Still in «Geek mode»

## More on views

- a bit of programatic «autoLayout»

## Around the views in a few days (continuing)

- More complex mechanisms
  - ▶ And more delegation too

## Play with some useful notions

- Timers and interruptions
- A bit about multitasking

# What's next this week

## Don't even think about StoryBoard again

- ▶ And more de

**You will love the exercise**

A real action game...

## Play with some useful notions

- Timers and interruptions
- A bit about multitasking
