

# «Tap&Play»

Fabrice.Kordon@lip6.fr

# Goal of the exercise

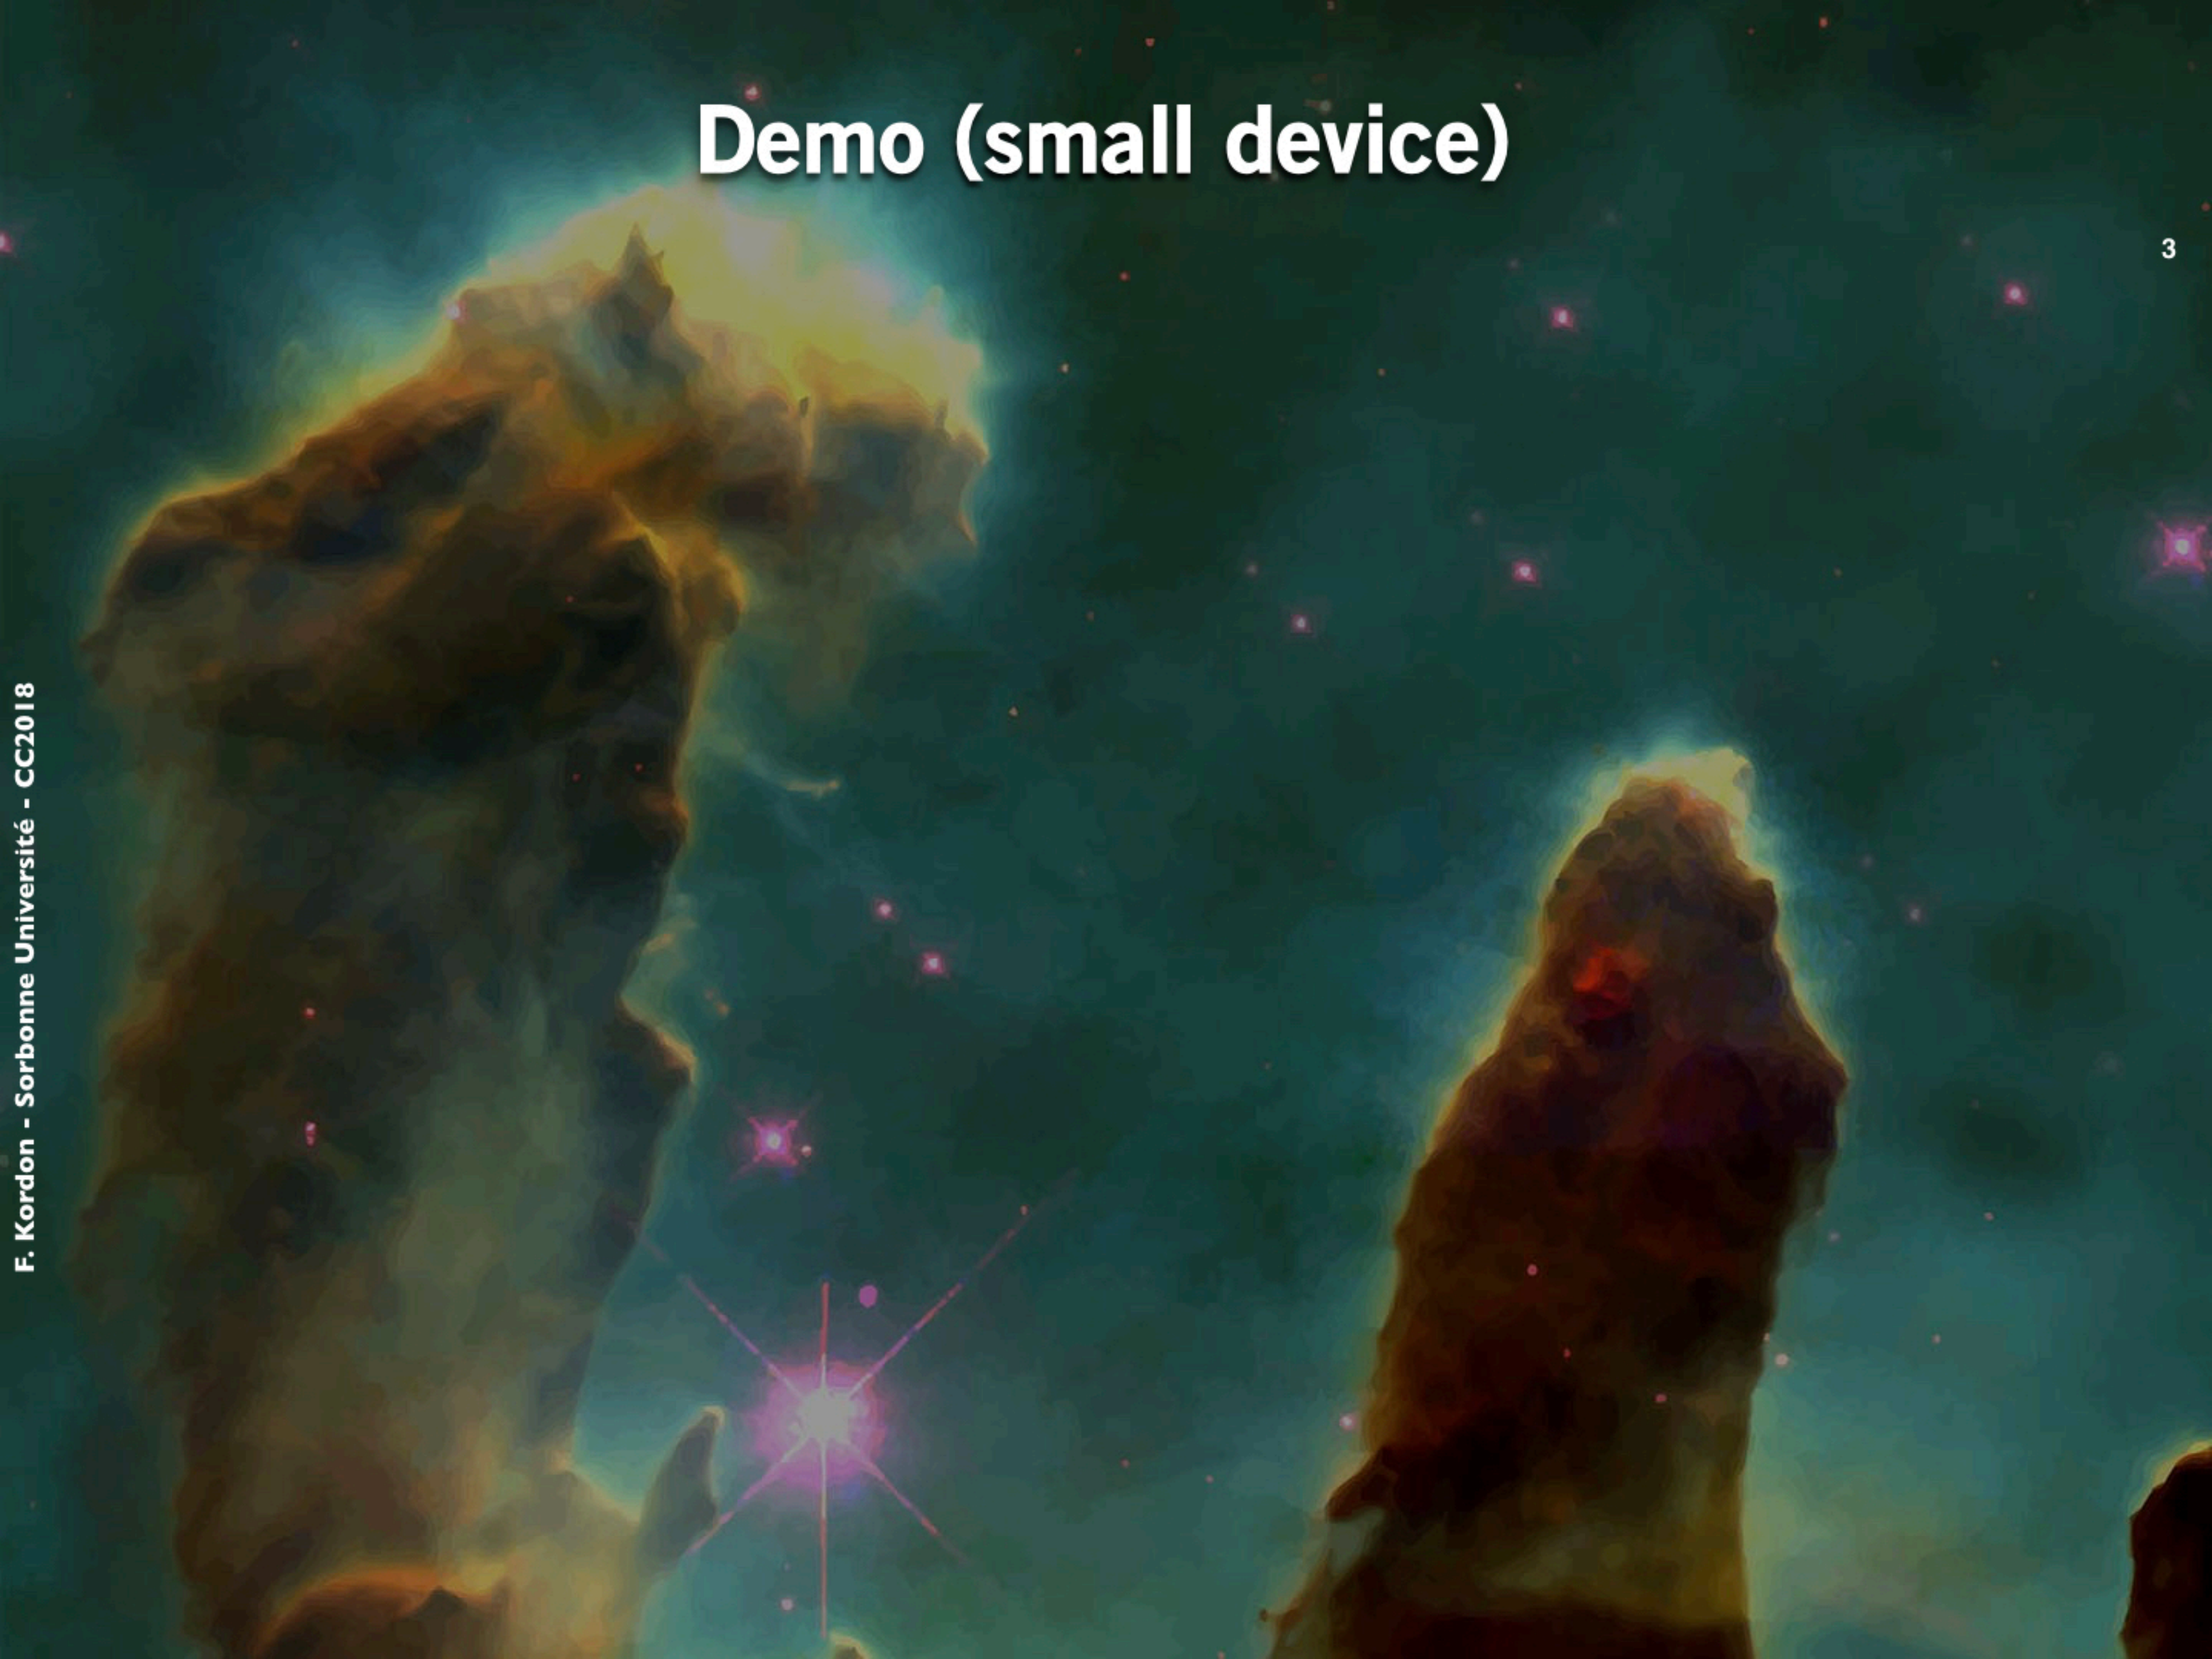

## Play with the music library... ... and play music

- Load the full list of songs from the device
- Activate / deactivate play with a «double tap»
- Swipe right to pass to next track
- Swipe left to pass to previous track
- Display history of visited tracks
- Differentiated behaviour in small/large devices
  - ▶ UISplitView in large device
  - ▶ UITabBar in small devices

# Demo (small device)

# Demo (large device)

# As a conclusion...

## Be aware of

- Interaction between the two views (large device)
- Adapted support of the two types of devices

## You have the know how!

- You may enrich the exercise
  - ▶ Add a `MPMediaPickerController`?
- Resources on the video companion web page
